LOYALTY BUSINESS

Current website
Design-review pack

24 screens and states, each captured at desktop and mobile widths. Use these pages to orient your design review, then open the full-page PNGs for long forms, detail and below-the-fold content.

WHAT THIS DOCUMENT SHOWS

The existing application and real local API behavior using an isolated disposable database. No production customer data or private signed-in browser was captured.

HOW TO USE IT

Upload CHATGPT-PROMPT.md and visual-overview.png first. Add this PDF and the full-resolution PNG pairs for the screens you want redesigned. Public frontend source and the current-site brief are included in the complete ZIP.

CAPTURE FORMAT

Desktop: 1440 x 1000 viewport. Mobile: 390 x 844 viewport. Browser: headless Microsoft Edge. Reduced motion. Each following page shows the first viewport; the PNG files preserve the full page.

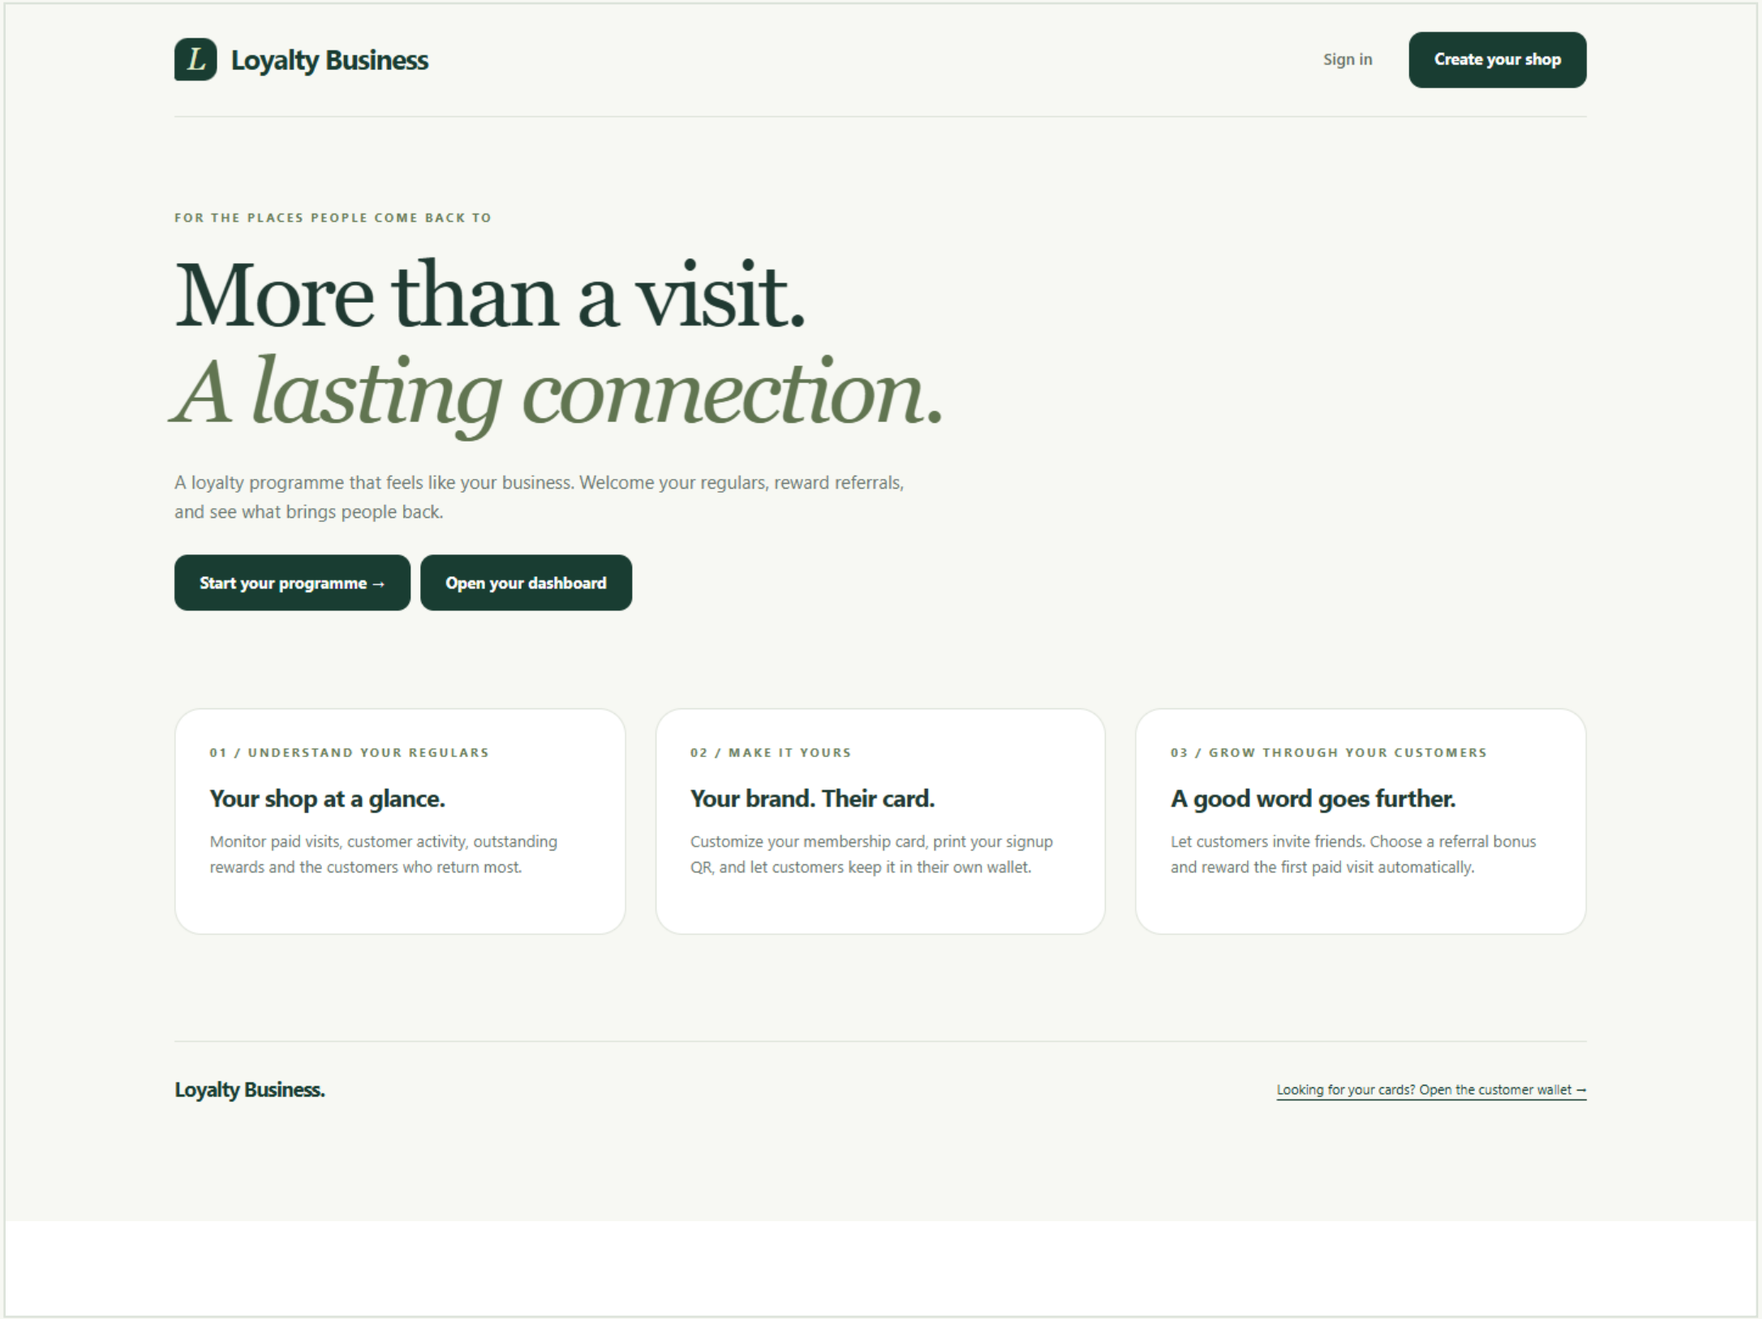

IMPORTANT LIMIT

This is a design snapshot, not proof that every planned product feature is complete. The QR poster is shown in its real local setup-required state. Native wallet passes, real-device camera behavior and live integrations are not simulated as working.
